Summary

Online merchandiser with 3+ years in e-commerce (2023 to present), managing a 50K+ SKU Shopify catalogue on Harvey Norman's Irish site, and an outsourced team of three that supports the Computers department. Owns product and category presentation, content quality, SEO and promotions, and uses AI tools to build faster, more consistent product pages. Kept the live site trading through a full platform migration, and works daily with the major electronics and computing brands.

Skills

Online merchandising: Catalogue and category management, product-page content and imagery, navigation, promotions, launches

E-commerce and SEO: Shopify, WordPress, on-page and technical SEO, GA4, Search Console, CRO, Mailchimp email flows

AI and process: LLM-built scripts and tools, bulk product-build automation, UAT and testing, process improvement, training and documentation

Experience

Assistant E-commerce Merchandiser, Computers & Electronics

Harvey Norman

Dublin, Ireland

Jan 2026 – present

- Manage the online catalogue of **50K+ active SKUs** on the Harvey Norman Ireland site, working with **20+ brand partners** including Samsung, Apple, HP, Google and Lenovo on range, content and launches.
- Manage an **outsourced agency team of three** that supports the Computers department's product content and catalogue work, setting priorities and reviewing the output.
- Core contributor to the migration from Shopfront to Shopify: kept the live site trading with **no loss of traffic across roughly 3M weekly visits**, and ran **300+ UI/UX**, search, logistics, inventory and internal-system tests to find bugs and improve efficiency and customer experience.
- Led the iPhone 18 series launch, which generated about **EUR 1.1M revenue in its first 42 hours**, and the Samsung S26 launch (close to EUR 20K in the first 42 hours).
- Brought in the promotions application that now powers every discount and promotion across Harvey Norman Ireland, and produced the training videos and documentation for the rollout.
- Use LLMs to build scripts and systems that speed up product builds: Product Builder creates SKUs in bulk from a single GTIN, and a competitor monitor tracks rival sites' prices and promotions.
- Currently leading a project to optimise product-page body HTML to improve layout and UI across the whole website.
- Worked across the computers, electronics and furniture & bedding departments; promoted from contract to full-time within two months.

Account Manager, E-commerce & SEO

Castle Kevin Digital

Dublin, Ireland

Jan 2025 – May 2025

- Revamped the agency's website on WordPress, from full audit through wireframes, page layouts and content.
- Ran front-end, back-end and technical SEO with Search Console and GA4, lifting organic traffic 34% and lead submissions 17%.
- Built Mailchimp email retargeting flows for warm audiences and wrote optimised product descriptions across 150+ SKUs for an e-commerce client.

Marketing Communications Specialist

Nano Quinn

Mumbai, India

June 2023 – May 2024

- Developed growth strategy for a B2B nanotechnology brand; an SEO overhaul moved rankings from page 30 to the top 3 within a month.
- Ran Google Ads and SEO lead generation producing 5-6 qualified B2B leads a day, including enterprise accounts such as Indian Navy, Asian Paints, Tata Steel and Reliance Industries.
- Launched the e-commerce pipeline for new product launches (Surface Cleaner) through Amazon, Blinkit and Zepto.

Projects

- Hawkeye, competitor price and promotion monitor (self-built)**

Jan 2026

 - Built a competitor monitor tracking 24,392 products across 6 rival retailers (custom adapter per site for different platforms, anti-bot set-ups and data formats) into one live dashboard; caught 9,011 price moves in 3 months and designed to replace a five-figure annual subscription.

Education

- Dublin City University**

MSc in Digital Marketing

Dublin, Ireland
Sept 2024 – Sept 2025
- Amity Global Business School**

BBA in Marketing

Mumbai, India
