Summary

E-commerce operator who diagnoses process bottlenecks and builds the systems that fix them. At Harvey Norman Ireland: core member of a live-site platform migration, owner of search relevance testing, and builder of in-house tools for competitor intelligence and product onboarding. Brings a problem-first approach, clear documentation and cross-team delivery.

Skills

Consulting skills: Problem structuring, process analysis, stakeholder management, UAT and testing, documentation and training

Domain: E-commerce operations, platform migration, catalogue and pricing intelligence, search relevance, CRO and SEO

Tools: Shopify, GA4, Excel, Python-based automation, AI-assisted development, Canva

Experience

Assistant E-commerce Merchandiser, Computers & Electronics

Dublin, Ireland

Harvey Norman

Jan 2026 – present

- Problem: a retail site had to move to a new platform without stopping trading. Approach: audited the site and ran UI/UX, search and system testing as a core member of Project Midnight (Shopfront to Shopify). Result: new platform brought up while the live site kept trading.
- Problem: on-site search results were not reliably relevant on a 3M+ weekly-session store. Approach: tested against 7,000+ queries, then built an API-driven audit that scores 30-40K search terms at once. Result: a repeatable relevance check instead of manual sampling.
- Problem: building product pages was slow and inconsistent. Approach: built Product Builder, which finds source content by GTIN, flags matches for review and builds to the store's category style. Result: 30-50 products per run.
- Launch delivery across Samsung, Apple and Google ranges: Samsung S26 generated close to EUR 20K in its first 42 hours and the iPhone 18 launch about EUR 1.1M in its first 42 hours.
- Promoted from contract to full-time within two months; produced training videos and documentation and am leading the rollout of a new promotions engine (AIOD).

Account Manager, E-commerce & SEO

Dublin, Ireland

Castle Kevin Digital

Jan 2025 – May 2025

- Revamped the agency's website on WordPress, from full audit through wireframes, page layouts and content.
- Ran front-end, back-end and technical SEO with Search Console and GA4, lifting organic traffic 34% and lead submissions 17%.
- Audited an e-commerce client's site and wrote optimised product descriptions across 150+ SKUs.

Marketing Communications Specialist

Mumbai, India

Nano Quinn

June 2023 – May 2024

- Developed growth strategy for a B2B nanotechnology brand; an SEO overhaul moved rankings from page 30 to the top 3 within a month.
- Ran Google Ads and SEO lead generation producing 5-6 qualified B2B leads a day, including enterprise accounts such as Indian Navy, Asian Paints, Tata Steel and Reliance Industries.
- Launched the e-commerce pipeline for new product launches (Surface Cleaner) through Amazon, Blinkit and Zepto.

Marketing E-commerce Executive

Mumbai, India

Gokyo

Jan 2023 – May 2023

- Led the design and launch of the D2C Shopify store, driving 42% monthly revenue growth in its first quarter.
- Improved conversion through UX testing of cart and checkout and A/B tested cross-sell/upsell widgets: average order value +12%, cart drop-offs -10%.
- Managed Amazon Marketplace listings (titles, metadata, A+ content) with daily inventory checks; ran Google Ads at 9% CTR and 3.5x ROAS.

Projects

- Hawkeye, competitor intelligence platform (self-built)**

Jan 2026

 - Built a competitor monitor that tracks price changes, promotions and launches across very different websites (custom adapter per site for different platforms, anti-bot set-ups and data formats) into one live dashboard; designed to replace a five-figure annual subscription.
